- Sheet Molding Compound Film

Shrink Bundling Film

Shrink bundling provides a cost effective way to multipack your products. General Plastic custom manufactures shrink bundling film tailored to your company's specific needs. We will deliver a product with excellent strength, clarity and shrinkage to properly package your products.

Film can be designed for shrink tunnel applications as well as manual shrink applications using a heat gun.

VCI Products:

Our VCI products are cost effective and proven for basic corrosion protection. They are designed to protect both ferrous and non-ferrous metal components during storage, operations, and shipping.

Our VCI Products are used in the following industries:

- Automotive
- Foundries
- Fire Arms
- Overseas Shipments
